# WHY GRETA?

The GRETA™ system is the ideal solution designed by and for grocers and retailers. From state-of-the-art label printing technology and scale integration to file management, GRETA™ offers all the features you need at an affordable cost.

## **Automatic Reports**

Streamline your operations and have reports be done automatically, so you never have to export your sales and analyze reports. Vendor management, inventory tracking, and purchase ordering and receiving are all a breeze!

## **Label Printing Station**

Streamline your label printing operation with a custom label design. The GRETA™ label printing station works fast and supports random-weight objects.

## **Loyalty Programs & Gift Cards**

Increase store traffic and establish customer retention with easy-to-apply customer loyalty programs and gift card applications. Both are included free with your GRETA™ system.

## **Invoicing & Record Keeping**

With the GRETA™ system, invoicing and record keeping are easy and fast. Gone are the days of manual log books and late nights catching up on spreadsheets.

## **Work 100% in the Cloud**

All of your data, loyalty programs, customer information, and more are saved in a cloud-based enterprise management system. The system allows for scalability so that you can manage your devices across all locations from one place.

## **Inventory Management**

GRETA™ allows for inventory management through reporting by bin location, tracking purchase orders, and shipping and receiving management. The data from all your business locations are stored in your GRETA™ Digital.

## **Vendor Management**

Keep track of your store's vendors in one easy-to-access location. You can manage how many products you have and what products are more or less popular and respond accordingly, saving you money and valuable shelf space.
